

# Efficient Lighting & Motor Rebates

## Qualifying Measures Worksheet

The Jamestown BPU has evaluated and qualified the energy saving measures listed on this page. For the measure to be eligible it must meet the minimum efficiency criteria listed. For rebates greater than \$1,000, pre-approval is required. Should you require pre-approval, or for more assistance, please contact Dan Reynolds at 716-661-1646.

Approved Measure	Efficiency Criteria <i>documentation required</i>	Incentive Amount <i>(not to exceed equipment cost)</i>	Description of Equipment Installed	Qty.	Total Incentive Amount
LED Light Fixtures (interior or exterior including freezer and cooler cases)	Must be new LED hard-wired fixture. Fixture must be DLC listed or receive pre-approval.	16-30 watts: \$20 each 31-60 watts: \$40 each 61-100 watts: \$50 each 101-200 watts: \$100 each 201 watts or greater: \$150 Each			
4' Linear LED Lamps	Must be new DLC listed lamps. Can be with or with out integrated ballast.	Up to \$5 per lamp.			
High Bay T-5 fixtures	Fixtures must be new	Up to \$50 per fixture			
Occupancy Sensors	Each unit shall be hardwired, passive infrared and/or ultrasonic. Manual ON override capability are NOT eligible.	Up to \$30 per control			
NEMA Premium Efficiency Motors 1-200 HP	www.nema.org for qualifying equipment	1-7.5 HP 10-25 HP 30-100 HP 125-200 HP	: Up to \$25 per HP : Up to \$15 per HP : Up to \$7.50 per HP : Up to \$5 per HP		
Variable Speed Drives (VSD) for single-speed motors	Must submit documentation of motor HP that drive is controlling	1-10 HP 15-25 HP 30-50 HP 60-100 HP	: Up to \$200 per HP : Up to \$125 per HP : Up to \$100 per HP : Up to \$75 per HP		
Electric Vehicle Supply Equipment (EVSE)	Must be Level 2 or higher EVSE	Full cost of equipment
