

Vending Machine Controls Request Form

The Jamestown Board of Public Utilities (BPU) is offering commercial electric customers an opportunity to purchase vending machine control systems at a subsidized cost of \$50. Through tests that the BPU has conducted, these controls have reduced electric consumption of cold beverage vending machines by over 1000 kilowatt hours each year, saving approximately \$80 annually.

The vending machine controls available through this program are intended for use with refrigerated vending machines that contain non-perishable foods and beverages such as soda machines.

How To Apply:

To receive a vending machine control, please complete this form and mail or deliver to:

Jamestown BPU
Attn: Energy Efficiency Coordinator
P.O. Box 700, 92 Steele Street
Jamestown, NY 14701

Once approval is given, the Energy Efficiency Coordinator will contact you and set up a time for the pickup or delivery of the vending machine controls. Installation of the controls and metering of the vending machines is available upon request.
