

Notice about Meter Sockets

Effective August 19th, 2013

The Jamestown BPU will no longer provide 200A, or less, rated single phase or three phase meter sockets for residential and non-residential customers. August 16th is the last day sockets will be distributed at the BPU Customer Service office. A specification sheet showing pre-approved sockets and specifications can be found at local electrical suppliers, BPU Customer Service at 92 Steele St. or online at www.jamestownbpu.com.

An application must be completed and an approved service and meter location spot must be done by a BPU official prior to installation. A copy of the residential and non-residential service application instructions can be picked up at BPU Customer Service or found online at www.jamestownbpu.com.

Questions regarding the application process or meter location spots should be directed to Tracy @ (716) 661-1642.
